Lighting Global Product Testing Verification

Pico Solar Home Systems (PSHS) (Assembled in Ethiopia)

This verifies that the Pico Solar Home Systems (PSHS) product family was tested according to the Quality Test Method in the latest edition of IEC 62257-9-5, or the Lighting Global Quality Assurance Protocols for Solar Home System Kits, as applicable. The product family met the Lighting Global Quality Standards. The product family includes the following kits: PSHS 3000, PSHS 4500, PSHS 7500, and Solar Charging Station.

Testing Details:
- Product Name: Pico Solar Home Systems (PSHS) (Assembled in Ethiopia)
- Model Number: See list above
- Company Name: fosera Group
- Country of Origin: Thailand
- Company Contact: Guzman Zotes, info@fosera.com
- Original QTM Sample Size: n=6
- Renewal Test Conducted: yes
- Sample Procurement Method: Random warehouse sampling
- Testing Laboratory: Schatz Energy Research Center, Arcata, CA USA

Documentation:
- Specifications book with verified test results and original version of this verification:
  - www.lightingglobal.org/products/fs-pshs
- Specifications sheets with verified test results for selected systems within this product family:
  - www.lightingglobal.org/products/fs-pshs3000
  - www.lightingglobal.org/products/fs-pshs7500

Expiration Date: July 31, 2020

<tr>
<td></td>
<td>Product Name and Model Number accurately specified</td>
<td>Pass</td>
</tr>
<tr>
<td></td>
<td>Performance and Component Ratings accurately specified. Any description of the product that appears on the packaging, inside the package and in any media shall be truthful and accurate. No statements shall mislead buyers or end users about the utility of the product. Numeric ratings must deviate no more than 15% from actual performance (note that it is acceptable for actual performance to exceed advertised performance).</td>
<td>Pass</td>
</tr>
<tr>
<td>Lumen Maintenance</td>
<td>Average relative light output ≥ 85% of initial light output at 2,000 hours with only one sample allowed to fall below 75% OR All 6 samples maintain ≥ 95% of initial light output at 1,000 hours</td>
<td>Pass</td>
</tr>
<tr>
<td>AC-DC Charger Safety</td>
<td>Any included AC-DC charger carries approval from a recognized consumer electronics safety regulator</td>
<td>n/a</td>
</tr>
<tr>
<td>Battery Composition</td>
<td>No battery may contain cadmium or mercury at levels greater than trace amounts</td>
<td>Pass</td>
</tr>
<tr>
<td>Battery Protection</td>
<td>Protected by an appropriate charge controller that prolongs battery life and protects the safety of the user. 5 out of 6 samples must meet the requirements outlined in Lighting Global Quality Standards.</td>
<td>Pass</td>
</tr>
</tbody>
</table>
| Battery Durability               | The average capacity loss of 6 samples must not exceed 25% and only one sample may have a capacity loss greater than 35% following the battery durability storage test as defined in IEC/TS 62257-9-5 Annex BB*  
*This product also meets the Battery Longevity requirement described in KS 2542:2014: the measured capacity after storage is at least 80% of the measured capacity before storage; no more than 1/6 samples fail | Pass    |
| Physical Ingress Protection      | Minimum IP2X for all products, IP3X for PV modules, and IP5X for fixed integrated outdoor products | Pass    |
| Water Ingress Protection         | Degree of protection required is based on product type:  
Fixed separate (indoor): No protection required  
Portable separate: Occasional exposure to rain  
Portable integrated: Frequent exposure to rain  
Fixed integrated (outdoor): Permanent outdoor exposure  
PV modules: Outdoor rooftop installation | Pass    |

Additional details on the requirements listed above are provided in the Lighting Global Quality Standards, available here: https://www.lightingglobal.org/qa/standards/

All Quality Standards above are evaluated based on test methods described in the latest edition of IEC/TS 62257-9-5 for kits in the product family with peak power ratings less than or equal to 15 W.

Kits in the product family with peak power ratings greater than 15 W are evaluated based on the Lighting Global Quality Assurance Protocols for Solar Home System Kits and found to meet the Lighting Global Quality Standards for SHS Kits.
