Lighting Global Product Testing Verification
G1 Solar Power Lantern with Phone Charger

Expiration Date: September 30, 2021¹
Verify here: www.lightingglobal.org/products/ri-g1spl

This verifies that the G1 Solar Power Lantern with Phone Charger was tested according to the Quality Test Method stipulated in edition 4 of IEC 62257-9-5² and complied with the Lighting Global Pico PV Quality Standards.³

**Testing Details:**
- Product Name: G1 Solar Power Lantern with Phone Charger
- Model Number: RNG1
- Company Name: Renewit Solar Limited
- Country of Origin: China
- Company Contact: Richard Atwal, richard@renewit.com
- Original QTM Sample Size: n=2
- Renewal Test Conducted: yes
- Sample Procurement Method: Random warehouse sampling
- Testing Laboratory: Shenzhen Academy of Metrology and Quality Inspection, Shenzhen, Guangdong, China

**Documentation:**
Specifications sheet with verified test results and original version of this verification: www.lightingglobal.org/products/ri-g1spl

Russell Sturm
Global Head, Energy Access
Lighting Global Project Manager
International Finance Corporation

¹ Lighting Global requires re-testing every two years or upon major product revisions, and in special cases reserves the right to grant an extension on results validity.

<table>
<thead>
<tr>
<th>Category</th>
<th>Quality Standard</th>
<th>Verdict</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Truth In Advertising</strong></td>
<td>Manufacturer, Product Name and Model Number accurately specified [Performance and Component Ratings accurately specified. Any description of the product that appears on the packaging, inside the package and in any media shall be truthful and accurate. No statements mislead buyers or end users about the utility of the product. Numeric ratings deviate no more than 15% from actual performance (note that it is acceptable for actual performance to exceed advertised performance).]</td>
<td>Pass</td>
</tr>
<tr>
<td></td>
<td>Port voltage and current specifications, if provided, are accurate. Included appliances function when connected to ports. Power output of ports is sufficient to power appliances that are advertised but not included. Ports that are intended for a function other than providing power, such as data ports, are not required to meet this standard.</td>
<td>Pass</td>
</tr>
<tr>
<td><strong>Lumen Maintenance</strong></td>
<td>Average relative light output $\geq 85%$ of initial light output at 2,000 hours with only one sample allowed to fall below $75%$ OR All 6 samples maintain $\geq 95%$ of initial light output at 1,000 hours</td>
<td>Pass</td>
</tr>
<tr>
<td><strong>Circuit and Overload Protection</strong></td>
<td>Products include a current limiting mechanism to prevent irreversible damage to the system. The mechanism is easily resettable or replaceable by the user, or automatically resets. If replaceable fuses are used for circuit protection, sizes are labeled on the product and listed in the user manual, and, if fuses are replaceable by the user, at least one spare fuse is included with the product. Included appliances are not required to meet this standard unless they have ports that are intended to provide power.</td>
<td>Pass</td>
</tr>
<tr>
<td><strong>AC-DC Charger Safety</strong></td>
<td>Any included AC-DC charger carries approval from a recognized consumer electronics safety regulator</td>
<td>n/a</td>
</tr>
<tr>
<td><strong>Hazardous Substances Ban</strong></td>
<td>No battery may contain cadmium or mercury at levels greater than trace amounts</td>
<td>Pass</td>
</tr>
</tbody>
</table>
### Category Quality Standard Verdict

**Battery Protection**

Protected by an appropriate charge controller that prolongs battery life and protects the safety of the user. 5 out of 6 samples meet the requirements outlined in Lighting Global Quality Standards. Lithium batteries carry IEC 62281, IEC 62133-2, UL 1642 or UN 38.3 certification and have overcharge protection for individual cells or sets of parallel-connected cells. Batteries of included appliances must also meet this standard.

**PV Overvoltage Protection**

If the battery is disconnected or isolated, the system is not damaged and the load terminals maintain a voltage that is safe for their intended uses.

**Miswiring Protection**

The user interface is designed to minimize the likelihood of making improper connections. If improper or reversed connections can easily be made, they cause no damage to the system or harm to the user.

**Physical Ingress Protection**

IP2X for all products, IP3X (or 2X + circuit protection) for PV modules, IP5X for fixed outdoor products.

**Water Ingress Protection**

Degree of protection required is based on product type:
- Fixed separate (indoor): No protection required
- Portable separate: Occasional exposure to rain
- Portable integrated: Frequent exposure to rain
- Fixed integrated (outdoor): Permanent outdoor exposure
- PV modules: Outdoor rooftop installation

**Drop Test**

Fixed separate (indoor): No requirement
All other products: 5 out of 6 samples are functional after drop test; none result in dangerous failures.

**Soldering and Electronics Workmanship**

The system and any included appliances are rated “Good” or “Fair” for workmanship quality as defined in Annex F of IEC/TS 62257-9-5. At most, one sample may fail to function when initially evaluated.

**Mechanical Durability**

All samples and included appliances are functional after Switch, Connector, Gooseneck and Strain Relief tests; none result in dangerous failures.

Additional details on the requirements listed above are provided in the Lighting Global Quality Standards, available here: www.lightingglobal.org/quality-assurance-program/our-standards/

Products are tested according to the test methods described in edition 4 of IEC/TS 62257-9-5 and meet the Lighting Global Pico-PV Quality Standards.
