Lighting Global Product Testing Verification
SunBell Smart

Expiration Date: January 31, 2022¹
Verify here: www.lightingglobal.org/products/bp-sbsmart

This verifies that the SunBell Smart was tested according to the Quality Test Method stipulated in edition 4 of IEC 62257-9-5² and complied with the Lighting Global Pico PV Quality Standards.³

Testing Details:
Product Name: SunBell Smart
Model Number: --
Company Name: Bright Products
Country of Origin: China
Company Contact: Mohammed Yassin, info@bright-products.com
Original QTM Sample Size: n=6
Renewal Test Conducted: yes
Sample Procurement Method: Random warehouse sampling
Testing Laboratory: Shenzhen Academy of Metrology and Quality Inspection, Shenzhen, China

Documentation:
Specifications sheet with verified test results and original version of this verification: www.lightingglobal.org/products/bp-sbsmart

<table>
<thead>
<tr>
<th>Category</th>
<th>Quality Standard</th>
<th>Verdict</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Truth In Advertising</strong></td>
<td>Manufacturer, Product Name and Model Number accurately specified. Performance and Component Ratings accurately specified. Any description of the product that appears on the packaging, inside the package and in any media shall be truthful and accurate. No statements mislead buyers or end users about the utility of the product. Numeric ratings deviate no more than 15% from actual performance (note that it is acceptable for actual performance to exceed advertised performance).</td>
<td>Pass</td>
</tr>
<tr>
<td></td>
<td>Port voltage and current specifications, if provided, are accurate. Included appliances function when connected to ports. Power output of ports is sufficient to power appliances that are advertised but not included. Ports that are intended for a function other than providing power, such as data ports, are not required to meet this standard.</td>
<td>Pass</td>
</tr>
<tr>
<td><strong>Lumen Maintenance</strong></td>
<td>Average relative light output ≥ 85% of initial light output at 2,000 hours with only one sample allowed to fall below 75% OR All 6 samples maintain ≥ 95% of initial light output at 1,000 hours</td>
<td>Pass</td>
</tr>
<tr>
<td><strong>Circuit and Overload Protection</strong></td>
<td>Products include a current limiting mechanism to prevent irreversible damage to the system. The mechanism is easily resettable or replaceable by the user, or automatically resets. If replaceable fuses are used for circuit protection, sizes are labeled on the product and listed in the user manual, and, if fuses are replaceable by the user, at least one spare fuse is included with the product. Included appliances are not required to meet this standard unless they have ports that are intended to provide power.</td>
<td>Pass</td>
</tr>
<tr>
<td><strong>AC-DC Charger Safety</strong></td>
<td>Any included AC-DC charger carries approval from a recognized consumer electronics safety regulator</td>
<td>n/a</td>
</tr>
<tr>
<td><strong>Hazardous Substances Ban</strong></td>
<td>No battery may contain cadmium or mercury at levels greater than trace amounts</td>
<td>Pass</td>
</tr>
</tbody>
</table>
### Category: Battery Protection

Protected by an appropriate charge controller that prolongs battery life and protects the safety of the user. 5 out of 6 samples meet the requirements outlined in Lighting Global Quality Standards. Lithium batteries carry IEC 62281, IEC 62133-2, UL 1642 or UN 38.3 certification and have overcharge protection for individual cells or sets of parallel-connected cells. Batteries of included appliances must also meet this standard.

**Verdict:** Pass

### Category: Battery Durability

The average capacity loss of 6 samples does not exceed 25% and only one sample may have a capacity loss greater than 35% following the battery durability storage test as defined in IEC/TS 62257-9-5 Annex BB

**Verdict:** Pass

### Category: PV Overvoltage Protection

If the battery is disconnected or isolated, the system is not damaged and the load terminals maintain a voltage that is safe for their intended uses.

**Verdict:** Pass

### Category: Miswiring Protection

The user interface is designed to minimize the likelihood of making improper connections. If improper or reversed connections can easily be made, they cause no damage to the system or harm to the user.

**Verdict:** Pass

### Category: Physical Ingress Protection

IP2X for all products, IP3X (or 2X + circuit protection) for PV modules, IP5X for fixed outdoor products

**Verdict:** Pass

### Category: Water Ingress Protection

Degree of protection required is based on product type: Fixed separate (indoor): No protection required Portable separate: Occasional exposure to rain Portable integrated: Frequent exposure to rain Fixed integrated (outdoor): Permanent outdoor exposure PV modules: Outdoor rooftop installation

**Verdict:** Pass

### Category: Drop Test

Fixed separate (indoor): No requirement All other products: 5 out of 6 samples are functional after drop test; none result in dangerous failures.

**Verdict:** Pass

### Category: Soldering and Electronics Workmanship

The system and any included appliances are rated “Good” or “Fair” for workmanship quality as defined in Annex F of IEC/TS 62257-9-5. At most, one sample may fail to function when initially evaluated.

**Verdict:** Pass

### Category: Mechanical Durability

All samples and included appliances are functional after Switch, Connector, Gooseneck and Strain Relief tests; none result in dangerous failures.

**Verdict:** Pass
Additional details on the requirements listed above are provided in the Lighting Global Quality Standards, available here: www.lightingglobal.org/quality-assurance-program/our-standards/

Products are tested according to the test methods described in edition 4 of IEC/TS 62257-9-5 and meet the Lighting Global Pico-PV Quality Standards.
